

David Rincon Benavides

Senior AI Full Stack Engineer

CDMX, Mexico | davirin96@gmail.com | linkedin.com/in/david-rincon-benavides | github.com/davidbenadev | benadev.com

Senior AI Fullstack Engineer with over 7 years of experience designing, developing, and deploying web, mobile applications, and scalable backend solutions.

Specialized in AI-driven product development and end-to-end solutions using TypeScript, React, React Native, Node.js, Next.js, PHP, Laravel, Supabase, and PostgreSQL.

Experience in software architecture, APIs, Cloud, and DevOps with AWS, Google Cloud, Azure, Docker, Kubernetes, and CI/CD, as well as technical leadership and development of performance- and scalability-oriented systems.

PROFESSIONAL EXPERIENCE

Senior AI Full Stack Engineer

February 2023 – Present

Qanta Media | Remote, Costa Rica

- Development of web and mobile Full Stack applications using TypeScript, React, React Native, Next.js, Node.js, Supabase, AstroJS, and Strapi.
- Design, development, and maintenance of REST APIs and backend services with Node.js, Laravel, and Java Spring Boot, including modernization and migration of endpoints.
- Implementation of Artificial Intelligence solutions and integrations, incorporating AI models and services into applications and business workflows.
- Design and implementation of backend solutions and data persistence using Supabase, PostgreSQL, and performance- and scalability-oriented architectures.
- Deployment and management of applications on AWS, Google Cloud, Azure, and DigitalOcean using Docker, Kubernetes, autoscaling, and Production/QA environments.
- Automation of deployment processes through CI/CD and GitHub Actions, improving delivery consistency and development cycle efficiency.

Lead Backend Developer

July 2021 – February 2023

INFOTEC | CDMX, Mexico

- Led the development of secure web applications using Laravel, PHP, JavaScript, Vue.js, and jQuery, implementing development practices focused on security and data protection.
- Designed relational and non-relational database architectures with PostgreSQL and Elasticsearch, improving query efficiency and scalability by 30%.
- Managed maintenance and deployments on RHEL and CentOS using Docker and Red Hat OpenShift, improving system stability by 25% and reducing downtime by 30%.
- Developed server automations using Python and Bash, reducing time spent on manual operational tasks by 50%.
- Led and mentored a team of 3 developers, participating in technical decision-making, problem resolution, and project delivery.

Junior Full Stack Developer

March 2019 – July 2021

Presidencia de México | CDMX, Mexico

- Participated in the full web application development lifecycle, from requirements gathering and design to implementation and deployment, using Laravel, PHP, JavaScript, Vue.js, and jQuery; implemented improvements reduced user operational time by 30%.
- Designed, implemented, and maintained databases with PostgreSQL and MySQL, optimizing queries, performance, and data integrity.
- Configured and managed web servers with Nginx on CentOS, Ubuntu Server, and Fedora, using Git for version control and development collaboration.

SKILLS

Artificial Intelligence: Generative AI, OpenAI API, Gemini API, RAG, Vector Databases, AI Agents, MCP, Supabase Vector / pgvector

Programming Languages: TypeScript, JavaScript, Python, PHP, Java, Bash

Frontend: React, Next.js, Vue.js, Astro

Mobile: React Native, Cross-platform Mobile Development

Backend: Node.js, Laravel, Java Spring Boot, REST APIs

Databases: PostgreSQL, Supabase, MySQL, Elasticsearch, Database Design, Query Optimization

Cloud: Google Cloud Platform (GCP), Microsoft Azure, DigitalOcean

DevOps: Docker, Kubernetes, OpenShift, GitHub Actions, CI/CD, Linux, Nginx

Software Engineering: Software Architecture, System Design, API Integration, Scalability, Performance Optimization, Technical Leadership, Code Review.

EDUCATION

Universidad Autónoma Metropolitana

Computer Engineering

CDMX, Mexico | September 2014 - December 2018
